Software Engineering student with a diverse background in technologies and related topics. Passionate about AI (machine learning) and problem solving.

Work Experience

Current
Sept 2017

Project Development
HoGent, Ghent, Belgium
- During my education we learned to manage small to medium sized projects as a group or as an individual.
- Functional requirement analysis, product design and how to manage and split up the project (SCRUM).
- How to give a professional presentation to the customer (small demo included), and learn to process feedback in general.

May 2017
Feb 2017

Software Engineering Intern
IT Department of Bruges City, Bruges, Belgium
- Improving accessibility of an in-house developed web application by the city of Bruges. My task was mostly focussed on blind people and those who are visually impaired.
- Updating database documentation and writing queries (Linq and SQL) that feed a visualisation tool.
- Taking part in meetings and the daily Stand-Up. Supporting the SCRUM-master and how to start and finish a sprint.

Technical Skills

Skills | C#, Java, JavaScript, (T)SQL, Python, LaTeX, Bash, Kotlin, R

Tools | Git, ASP.NET, Android Development, UWP (Universal Windows Platform), React.js, Angular, Unit Testing, Docker, Vim, Azure

Languages | Dutch, English, French

Interests | Tensorflow, Evolutionary Algorithms, Machine Learning, Robotics, Big Data, IoT (Internet of Things)

Education

Current
Sept 2017

Bachelor of Science, Applied Computer Science
University College Ghent, Belgium
Relevant coursework: Artificial Intelligence, Object-Oriented Programming, Analysis of Algorithms, Statistics, Design Patterns, Linux and Windows Server, Database design, Group Projects, Web Development

June 2017
Sept 2015

IT Management
Sint-jozefsinstituut (High school), Brugge
Relevant coursework: Object-Oriented Programming, Business Development, Computer and server hardware, PHP Development
